

**Your guide to Caesarstone®
collections, colours & designs.**

2020 Edition

Introduction

Dear Customers,

Häfele has pioneered the way interior fittings are sold across the globe for many years now. Being a German company our foremost concern has always been to offer our customers products that are at the cutting edge of functionality and design; and backed by the highest standards in Customer Service. In our markets, we are increasingly being recognized as a one-stop interior specialist brand that can enable functionality for any interior design through a holistic solution offering, be it door hardware, furniture or kitchen fittings, sliding systems, built-in appliances, bathroom solutions, furniture lighting and interior surfaces.

At Häfele; we have always believed that "We are what we repeatedly do. Excellence, then, is not an act, but a habit." And it is this belief that led to the addition of Caesarstone, World's premier quartz surfaces to our product line. Since 1987, through a fusion of science, technology and artistic talent, Caesarstone has been creating quartz surfaces which are not only beautiful to look at, but also superior in adaptability and practicality. Whether you're a professional designer or simply looking to create exceptional personal interiors, Caesarstone surfaces are a starting point for all your creative endeavors. From kitchen countertops, bathroom vanities, wall paneling and even custom-made furniture, Caesarstone quartz surfaces are adaptable enough to use anywhere you imagine.

We now bring to you a detailed Catalogue from Caesarstone that takes you through its latest range of stones together with the existing collections, to give your interior space the much needed design edge. Artistically designed, this Catalogue will help you decide on your most preferred surface depending on the overall colour, texture and design of your interior space. The book takes you through Caesarstone's white or lighter surfaces at the start followed by the Dark colour collection to bring in the necessary contrasts to your interior design.

So dive into this world of exquisite design luxury and visit us at our Design Showrooms for a better understanding and detailed dialogue. We are taking all the necessary precautions at our end to make your visit a safe and fruitful experience.

Enjoy!

Jürgen Wolf

Managing Director
(Häfele South Asia)

Hafele

Reassuring Expertise

"For over 9 decades, we've been helping people make more of their homes.

Established in Germany, and now operating worldwide, we specialise in the fittings, hardware and systems that improve the way your home works. So when you choose our products as part of your new or reformed home, you know you're getting the benefit of extensive knowledge and decades of experience.

And we're still a family business, owned and managed by family members who really care about the products and service we provide. You can rely on our commitment to the

highest standards of quality and reliability, founded on a long tradition of German engineering where attention to detail is second nature.

All our home improvement ideas are built to last – day in, day out – we want you to get the very best from every corner of your home, for many years to come."

Hafele Worldwide

With its origin in 1923 in a small town named 'Nagold' from the Swabian region of Germany that nurses a passion for hardware technology, it is no surprise that Häfele has lived up to its roots through a successful presence in the architectural and furniture hardware industry for over 9 decades now. Today, Häfele's worldwide penetration includes 38 subsidiaries across Europe, America, Asia, Australia and New Zealand. With these subsidiaries and numerous other sales organisations, Häfele operates in over 150 countries. The Häfele headquarters, 4 manufacturing units and 10 sales offices are located within Germany; while 1 manufacturing unit is located at Budapest, Hungary. The company also owns one of the largest and most sophisticated warehouses in its home country. The Häfele worldwide workforce is empowered by a base of over 8100 employees.

The group services over 150,000 customers across the globe through its extensive range of hardware products and a comprehensive logistics system. In addition to this, Häfele also provides consultative services to its customers, educating and advising them about buying the correct hardware as per their requirements. With this level of market penetration and ability to handle worldwide demand, it comes as no surprise that the company is an authority in the segment of home interior solutions; what is pleasantly surprising, though, is that in spite of its size, Häfele still remains a family owned and run business with a unique, friendly and value-centric work culture which is strongly followed among all its subsidiaries.

Hafele India

 Head Office & Regional Offices

 Hafele Design Showrooms

Häfele India is a wholly-owned subsidiary of the Häfele Global network and has been operating in India since 2003 under the leadership of Mr. Jürgen Wolf (Managing Director). The ability of the company to understand the diverse Indian market has made it an authority in the field of architectural hardware, furniture and kitchen fittings and accessories. The company also has a strong presence in synergized product categories namely Home Appliances, Furniture Lighting, Sanitary and Surfaces catering to the focused demand from these industries.

The subsidiary has a strong nation-wide presence with offices in Mumbai, Pune, Ahmedabad, Bangalore, Chennai, Hyderabad, Delhi, Kolkata and Cochin. It has full-scale operations in Sri Lanka and Bangladesh with Regional offices and Design Showrooms in both the countries; and has also spread its operations to other regions of South Asia including Nepal, Bhutan and Maldives.

Häfele's design showrooms are hubs of international home interior trends and cutting edge designs presented in a world-class environment, where customers can see home solutions in their inherent applications. These showrooms function as a one-stop-shop for all home interior and improvement needs - from providing in-depth technical advice to kitchen and wardrobe designing services through a team of experts stationed at the showroom.

Häfele India services its customers with a base of over 1300 employees, a well-networked Franchise base of over 130 shops along with over 1000 dealers situated across South Asia. The subsidiary has a sophisticated Logistics centre in Mumbai along with distribution centres in Delhi, Bangalore, Kolkata and Colombo respectively.

The Quartz Advantage

When you're deciding what surface material to use for your next project, you need to determine what's most important.

Here are five key reasons why you should choose Caesarstone quartz surfaces.

There are five distinct advantages to choosing Caesarstone for your interior design.

Quartz - The Hard Wearing Surface

Caesarstone quartz surfaces have exceptional hard-wearing properties - created from up to 93% natural quartz aggregates, organic pigments and enhanced polymer resins.

Caesarstone Quartz surfaces have been the surfaces of choice for designers, the world over due to its long life span. It will not crack or chip as easily as granite or slate and does not require regular sealing like natural stone.

Caesarstone quartz surfaces outperform natural stone and laminate surfaces for durability in all standardised testing and are easily repairable.

Easy Care and Maintenance

Virtually water-resistant Caesarstone quartz can maintain its beautiful aesthetic for much longer than natural stone counterparts.

The water-resistant properties mean Caesarstone quartz surfaces are not as susceptible to absorbing everyday spills, bacteria or smells from raw foods.

For these reasons, Caesarstone quartz surfaces are the leading choice for kitchens, butlers pantry's, laundries and bathrooms in homes across the world.

Withstands Exposure to Heat

Caesarstone quartz surfaces have a high heat tolerance and can be used around kitchen hobs and for splashbacks, in line with regulations.

All stone surfaces can suffer damage from any sudden and rapid surface temperature changes.

We recommend you seek professional installation advice and check the warranty limitations before committing to any installations.

Sophisticated Designs, Crafted for You

Featuring in many of the most photographed homes globally; the finish, texture and depth of Caesarstone quartz surface designs deliver an unprecedented look for luxurious kitchen and bath spaces.

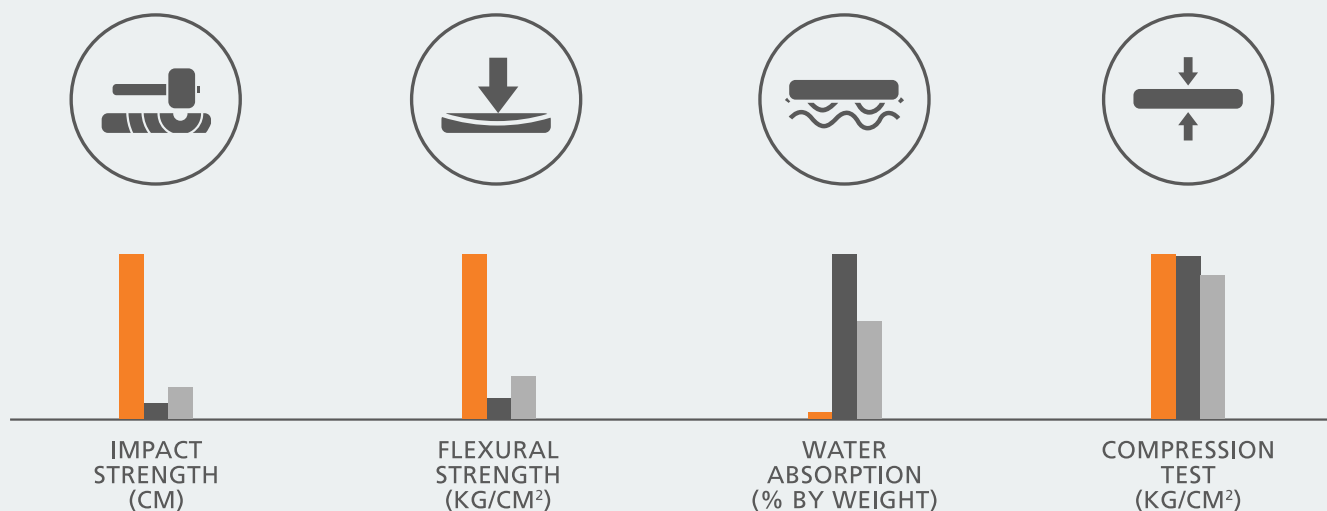

Caesarstone offers an array of inspirational colours and design styles; from beautiful marble-inspired designs to the latest innovative textures and industrial concrete designs.

Easy to Install

Highly-adaptable and easy to fabricate to almost any design or space, Caesarstone quartz surfaces are incredibly versatile; featuring in a broad range of applications from furniture to kitchens and laundries across residential, commercial and hospitality projects.

■ CAESARSTONE VS ■ MARBLE VS ■ GRANITE

CAESARSTONE OUTPERFORMS NATURAL STONES SUCH AS MARBLE AND GRANITE IN STANDARDIZED TESTING

The following results, from testing by an independent agency, show the high levels of performance of Caesarstone's physical properties compared with alternate surface offerings

Crack Resistant

Why Caesarstone?

At Caesarstone, we don't just make benchtops and quartz surfaces.

We choose to create surfaces that combine the pinnacle of performance and design to deliver something truly extraordinary.

Rich in sophistication and style, the premium nature of a Caesarstone benchtop will be a drawcard not just for you and your family, but for anyone who walks into your dream kitchen.

As the old adage says; don't compromise... "Do it once, do it well".

Quality You Can Depend On

Other products may look similar. But it is often what you can't see - the quality of raw materials, the manufacturing technology and the know-how of being the inventor of engineered quartz that makes the difference as to whether a product will give you years of trouble free service. If you are renovating or building a new home, office or hotel, insist on the Caesarstone brand. Don't settle for anything less.

Durability for Peace of Mind

Caesarstone pioneered the innovation of quartz surfaces almost 33 years ago, and since then Caesarstone has been the global leader in terms of Colour trends as well as the stone of choice for millions of projects across the world

Caesarstone gives you total peace of mind that you've chosen not just the durability and quality of a Caesarstone surface, but an inspired centrepiece for a lifetime of experiences.

Mould & Mildew Resistant

Scratch Resistant

Non-absorbent & virtually Non-porous

The World's Leading Benchtop Designs

At Caesarstone, we don't follow trends in colour and design. We set them.

Creating the world's leading surface designs is not done by computers. We have a team of dedicated designers who devote themselves to the highly skilled craft of premium surface design.

Our design team produces unique designs that not only set the trend but stand the test of time.

We capture not just the essence of today, but the promise of an inspirational future. Go behind the scenes with the design team in Crafted For You.

Your Renovation Partner

We make a complex process easy with support, inspiration and a human touch. We help you with all the details so you can bring your vision to life.

Visit our Design centers to talk to our Designers and view our extensive display for inspiration

The Choice of world renowned Architects and designers

Caesarstone is consistently specified as the number 1 choice of brand for benchtops, Furniture and wall cladding applications by the worlds leading Architects and designers.

They trust the product for its durability, its style and its timelessness. It's a reflection of the quality work they strive to deliver.

Environmentally pro-active and sustainable manufacturing

Caesarstone is committed to a Cleaner, Safer and Better Quality Environment. Our comprehensive environmental agenda includes:

- Commitment to ecologically responsible production processes.
- The development of environmentally friendly products made with high levels of recycled materials.
- The implementation of internationally recognized sustainable industrial standards and practices.

JAIME HAYON

Designs that Inspire Allied with Incredible Performance

World-renowned designers and architects choose to partner with Caesarstone® to set new design trends. While these collaborations have garnered many design awards, they have a much more important function for us. Design collaborations push us to push boundaries. We seek to innovate. Our ambition is to consistently set new standards for your interiors - to pioneer new styles, new collections and new textures that give our customers the latest, most cutting edge designs making Caesarstone® the surface of choice for designers like Oki Sato (Nendo), Philippe Malouin, Yael Mer & Shay Alkalay (Raw Edges), Tom Dixon & Jaime Hayon.

Anatomy of a benchtop

Caesarstone surfaces can be fabricated into a number of beautiful details that provide both practical as well as aesthetic benefits.

Kitchen plans

These are some of the most popular kitchen layouts, with something to suit most spaces.

Cutting a slab for a U-shaped kitchen

This example shows how a single slab of Caesarstone might be cut for a compact U-shaped kitchen, showing a cut-out for an under mount sink and allowing for a 100mm upstand around the entire length of the work surface and a 10mm overhang.

Surface Finishes

Caesarstone has expanded our line of finish options to include the rich layered looks of Concrete and Rough along with our sleek, standard Polished finish. These matte, textured surface designs are of the same high-quality quartz as the Polished finish yet present the option of a sensorial dimension with low sheen to satisfy different design styles

POLISHED

This elegant and reflective surface evokes luxury and modernity. Smooth to the touch, the Polished Finish is durable and long lasting. With minimal care and maintenance, Polished Finished surfaces add value to any design with their timeless and contemporary feel.

CONCRETE

This sleek matte Concrete Finish is a lightly textured finish inspired by the tactile nature of smooth concrete. It offers low light reflection that brings balance and a classic industrial presence to your design.

NATURAL

This slightly textural finish adds warmth to the grain for a unique sensory feel whilst its satin sheen gently reflects light. Suited to contemporary and classic interior designs, our Natural Finish combines the appeal of authentic texture with style and practicality.

ROUGH

A rich, complex and technologically advanced finish that reflects the authentic patinas of industrial materials. The Rough Finish offers a distinctively coarse surface yet remains smooth enough for effective cleaning.

Samples – do they tell the whole story?

Caesarstone is renowned for being the design leader when it comes to engineered quartz surface design. The dynamism and movement of these beautiful designs, made predominantly from natural quartz stone, is what makes them a centrepiece and artistic statement within the home. But with this comes some friendly advice for those looking to decide...

As Caesarstone offers have evolved over the years from monotone to multi-dimensional designs, samples only tell part of the story. For instance, what's displayed on a sample can vary noticeably on colours such as Rugged Concrete, Primordia and Calacatta Nuvo.

The back pages of this book also show a small sample swatch alongside the design across the full slab. Whilst our printed materials are produced to the highest standards in printing, they should be used as an indication of actual product colour, and we'd recommend this mindset when viewing any product brochure, whether it's quartz stone or any other interior surface.

The best advice?
Always visit a Hafele Design Center.

You will find state-of-the-art Caesarstone showrooms in all major cities of India, open to both the public and the design industry. Each showroom offers you the opportunity to view Caesarstone's full range of cutting-edge designs and explore the latest dynamic colour releases in floor to ceiling displays.

Showroom visitors can also benefit from the expertise of knowledgeable design consultants who are on-hand to provide advice and guidance you need at each stage of your design journey. They can also help you navigate other considerations such as the best edge style and profile for your design too.

You can also visit your nearest Caesarstone display at select Kitchen and Bathroom showrooms across the country offering a wide range of Inspiring Designs in selected Caesarstone colours.

Below demonstrates the variations of colour in samples.

Note the difference in colour scheme between these four 125x250mm samples for Primordia.

Mor Krisher

Chief Designer

Crafted For You.

The Blending of Art & Science.

Renowned for its pioneering quartz surfaces, Caesarstone has been at the forefront of the industry since the 1980s, innovating the aesthetics and performance of quartz surface design. So how does the design team find their inspiration and stay one step ahead?

In the early days of development, the design emphasis for quartz surfaces was very much on the technical benefits of the quartz improving its stability and resilience as a kitchen surface. Leaping beyond this uniform approach, Caesarstone invests in both design and research, enabling its dedicated design team to re-invent the aesthetic qualities too.

With Caesarstone for nearly a decade, Chief Designer, Mor Krisher, leads a revolutionary approach to design using a far more interpretive process.

"We have been designing surfaces for more than thirty years, and since day one we have intended to push technical and creative boundaries", says Mor.

"Manufacturing quartz surfaces is a blend of science and art and both aspects hold equal importance.

Beauty catches our eye, but if a product doesn't perform, then we quickly lose patience. We have an incredible technical R&D team which fortunately means that I

can focus my attention solely on the art of our brand."

With close to 100 products, Caesarstone offers a comprehensive range comprising monochromatic and subtle shades to natural industrial or marble-inspired surfaces. The demand for the natural look continues to grow, and the Caesarstone range with it.

"When we start working on new designs for our Supernatural and Supernatural Ultra products, we take several different qualities from natural stone and combine them. We work on the nuances of the design for many months until we are 100 per cent happy."

"The result is a beautifully natural-looking product you can't find in nature. We can give consumers and architects, something unique that can't actually be found anywhere else."

"You have to use your five senses, and be

focused on the search for the next trend," Mor says. "The clues for new trends are everywhere, and you have to be able to collect them all the time. The magic is transforming the trend to a relevant, beautiful product."

Creating the Dark Collection

Mor's explorative approach inspired the coveted Metropolitan Collection and recently, the evolution and launch of the Caesarstone Dark Collection.

"We've been working on our dark collection for several years," says Mor. "We decided to go outdoors and take a journey to the desert to observe nature and explore the organic materials there."

The transition from day to night opened up a well of new ideas and inspiration for Mor's team.

"Night changes our perception of what's around us. We wanted to see how various stones hold different colours and hues at night. Dark colours can be dramatic, bold and mysterious, or warm and comforting".

"Our senses heighten in the dark and with darkness comes a world of calm and comfort as we return to our homes at night," Mor explains.

Dark tones are the entire rich world of inspiration rekindling designers' interest in marbles and slate, natural tactile materials that evoke a sense of warmth.

Introducing his captivating new designs, Black Tempal, Empira Black and Piatto Black, Mor describes the attributes of each.

"The Black Tempal design has a complex composition of mineral-like layers. It captures the qualities of natural stone like travertine and slate. Warm whites expand across the slab in contrast to its black base."

Inspired by the authentic characteristics of natural forms, Mor says, "Empira Black is a creative interpretation of dark marble. It's a design beyond time and trend with all the mystery of the dark stone. Its dark base is composed of a rich deep black beautified by fine white natural veins."

Describing the Piatto Black Mor says it's "Just like the night, Piatto Black redefines the interior. Everything gets a new dimensionality, an infinity of black."

New product development at Caesarstone takes time – and many prototypes explains Krisher.

"After we develop the concept, we start the search for the right colours," he says.

"The colours must engage each other and complete one another. Then we start

the process of the hunt for the master slab. We are looking for the perfect combination of layers, colours and structure that best represents the concept."

Mor wants to add colour, texture and complexity to modern kitchen designs.

"I think the trend of sterile kitchens can't continue," he says. "Caesarstone doesn't like to advertise kitchens today without people. It's no longer a benchtop with cabinets. It's a space where food and people are joined together for dialogue. The kitchen is a playground for us to create joyful moments for our families and friends. It's a place where things happen, where people live."

Mor concludes that the design process is "an evolution – one thing leads to another. People are becoming bold in their choices. For me, it's an opportunity to create more. There is always so much more to discover and bring to our customers."

Black Tempal 5810

The Dark Collection

Caesarstone's new Dark Collection embraces a contemporary trend in kitchens and bathrooms that has recently set a bold tone. As an antidote to light and sometimes-ascetic colour palettes, this softer mood is much more striking and unexpected.

From the classic luxury of Empira Black™ to the matte infinity of Piatto Black™ and weathered Black Tempal™, the Dark Collection presents an intriguing range of captivating hues that bring warmth to the home and an emotional caress to the stone.

The Metropolitan Collection

Cutting edge. Urban aesthetic.

Caesarstone leads the industrial trend in urban interiors with its new Metropolitan Collection.

A collection inspired by the rough touch & unpolished colours, textures & patinas found in industrial architecture.

By embracing the essence of unique materials such as oxidised steel, weathered cement & hand-poured concrete, Caesarstone has achieved authentic patinas and variations, which capture real depth and movement, revealing different qualities that make the Metropolitan Collection unique.

Robust construction finishes have become a popular choice amongst urban consumers, inspired by factories and lofts, and translated into residential and commercial interiors. Each sturdy surface in the Collection has been designed to reflect the authentic textures of manufacturing, such as oxidized steel, poured plaster and raw concrete.

By innovating cutting-edge technology exclusive to Caesarstone, weathered patinas have been achieved in quartz for the very first time – a breakthrough that one can literally feel and experience.

These intriguing materials are organic, capturing real depth and movement; therefore, an engaging visual impact is embedded within each of the Metropolitan Collection's colours making them inspiring in kitchens, surprising in bathrooms and striking in hospitality.

“Tactility & heightened emotion embedded within each design.”

Frozen Terra™ 4601

Concrete. Terrazzo. Robust concrete fused with the playfulness of terrazzo. Translucent aggregate and fine black basalt sparsely embellished to a neutral base, mixing two contrasts into one whilst the matte Concrete finish adds another layer of allure.

Cloudburst Concrete™ 4011

Subtle. Sophisticated. Inspired by the uneven aspects of concrete and the colour of alabaster. White on white tonal cloud-like patina and Rough matt surface finish is a unique look, lightening up a space and evoking a refined, urban aesthetic.

Topus Concrete™ 4023

New. Neutral. Inspired by topological strata, combining mineral formations found in nature with the rugged patinas of industrial materials. Hints of neutral blush undertone echoes the pastels that are impacting the interiors market today.

Excava™ 4046

Bold. Authentic. Characterized by the intriguing patinas of casting and oxidizing, combining the authentic features of rust and concrete. Its beauty reflects the geological decay of stone, weathered by time and nature.

Airy Concrete™ 4044

Calm. Captivating. Versatile light grey, presenting a richness that minimalism can achieve. Airy textures, enriched by dark grey and white tones, with an authentic rough surface providing the true feel of concrete.

Primordia™ 4043

Organic. Industrial. The grey complexion echoes the character of concrete, evoking a contemporary feel. Composed across its grey base, soft mineral splotches range in off-whites & greys, combined with darker veils of grey and brown to reflect the oxidised rusts found in nature.

Rugged Concrete™ 4033

Rough. Refined. An authentic, robust, industrial-inspired design. Accentuated by dramatic gradients of grey textural patterns, white haze patina and a Rough matt surface finish, making each slab individually unique.

Black Tempal™ 5810

Deep, dark and intensely bold. Soft mineral deposits that give rise to a delicate, light veil of warm whites across the slab, in contrast to the sturdy black charcoal base.

Care & Maintenance

Designed to Endure the Everyday

Caesarstone surfaces require very little maintenance to keep them looking like new. For everyday routine cleaning of Caesarstone we recommend wiping the surface with warm soapy water (a mild detergent) and a clean damp cloth, or use our Spray Cleaner. Do not use the cloth you use to wash the dishes, as it may transfer oils and other contaminants to the Caesarstone surface. As Caesarstone is virtually non-porous, it will never require polishing or sealing.

Tough? Yes. Indestructible? No.

As with any surface, Caesarstone can be permanently damaged by exposure to strong chemicals and solvents that undermine its physical properties. Do not use products that contain trichlorethane or methylene chloride, such as paint removers or stripper. Avoid all contact with highly aggressive cleaning agents like oven cleaners that have high alkaline/pH levels. Should the surface be accidentally exposed to any of these damaging products, rinse immediately with water to neutralize the effect.

Heat Resistance

Caesarstone is heat resistant, however like all stone materials; Caesarstone can be damaged by sudden and rapid surface temperature changes. A good rule of thumb is that if your hand cannot tolerate the level of heat of an item to be placed on the surface for more than a few seconds, then the heat source is too high. Therefore we always recommend placing hot pots, oven trays and fry pans directly from the oven or hot plate onto a wooden chopping board or cork mat.

We also recommend that all electrical cooking appliances such as electric frying pans and slow cookers are also placed on a wooden chopping board.

Food Preparation

We always recommend cutting on an appropriate cutting board and never directly on the Caesarstone surface to avoid blunting kitchen knives or damaging the surface of your benchtop.

Cleaning Products

Our specially formulated range of cleaning products offer both everyday as well as thorough cleaning solutions designed to keep your surface looking their best for years to come.

Rough Surfaces

Caesarstone offers a range of designs with a technologically advanced surface we call 'Rough', which is different to our Concrete (or honed/matte finish). Despite the 'rough' impression, it's remarkably easy to care for and maintain. It should be noted that the low reflective surface of Rough may be more susceptible to showing everyday marks and spills compared to a polished surface. With all our surfaces, we recommend regular cleaning to help remove any visible marks and stains.

Concrete Surfaces

Concrete surfaces (similar to a matte or honed finish) may require additional daily and weekly care. As with any matte product, owners of Concrete finishes may experience seeing an increase in marks and smudges from everyday living. We encourage you to order a sample of our products that you are considering. When you receive your sample, try treating it to a few different scenarios that you may face in your kitchen; spill something on it, touch it with greasy fingers, clean it. This will help you understand how the surface responds to your daily life and how comfortable you feel with it. For both our Concrete and Rough surfaces, due to the nature of the surface design, it is recommended that common household spills like liquid droplets and rings are dried immediately.
