

THE BLISS OF SOLITUDE

with an exquisite bath experience

BATH SPA COLLECTION - 2020 | VOLUME 1.5

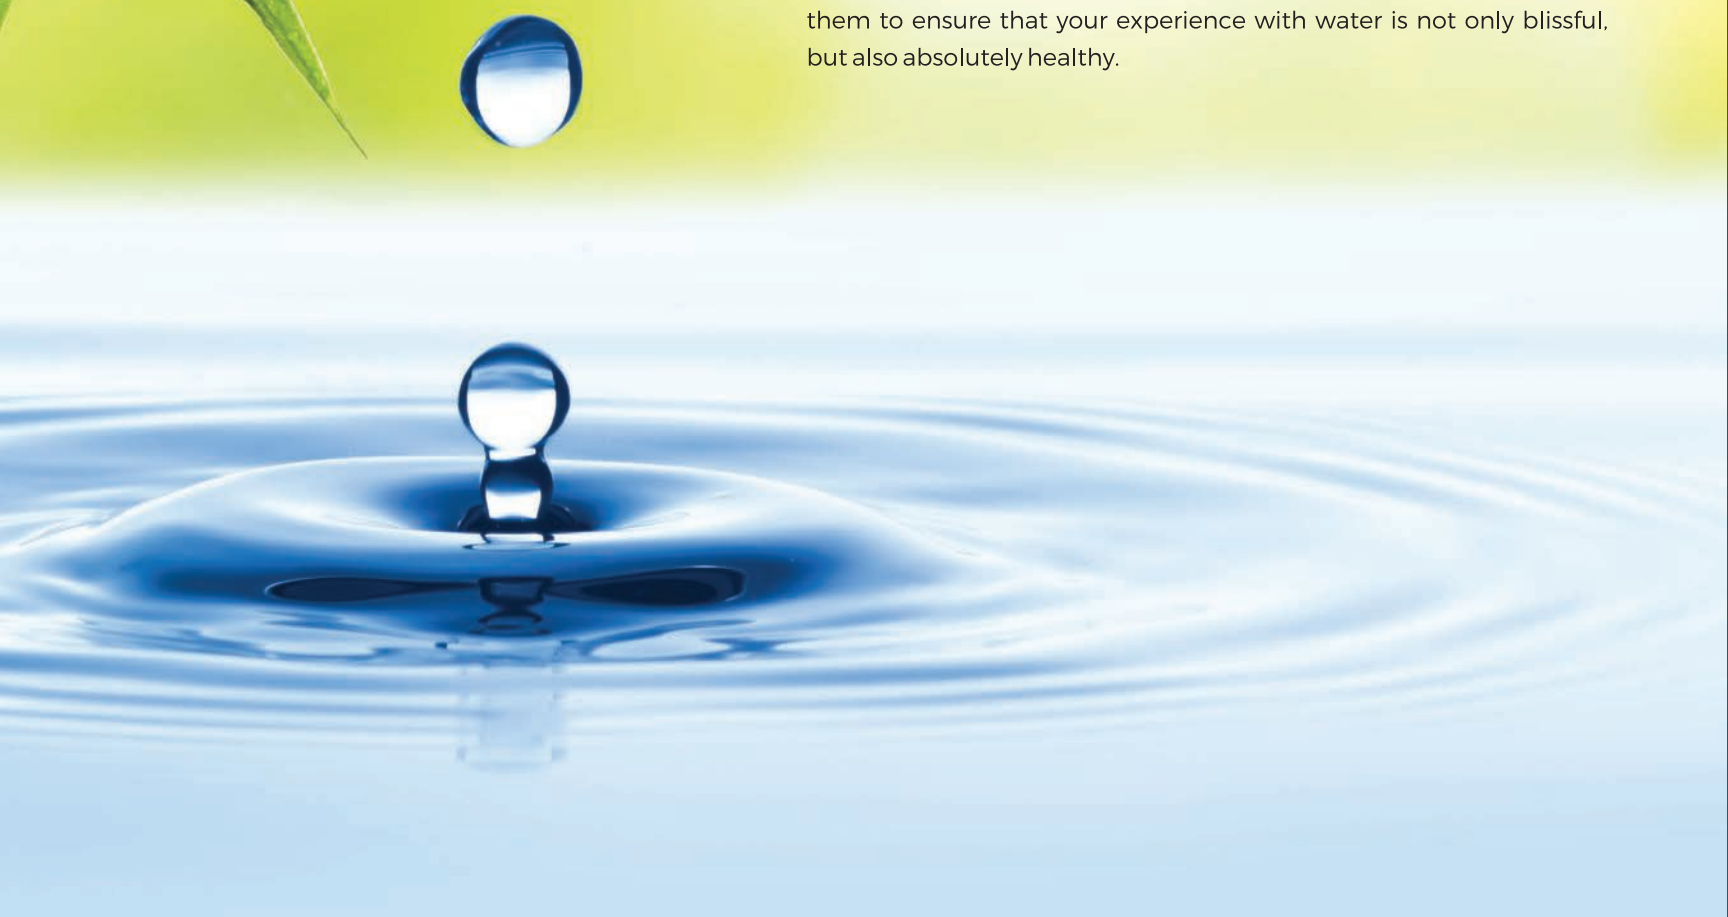

WATER-THE ELIXIR OF LIFE

Water is essential for the sustenance of life. It is not just imperative for survival, but also recognized as one of the vital source of holistic wellness, today. The first race of people to put into practice the benefits that water could bring to mind and body were the Romans, by introducing bathing as a refined daily habit. At Oyster, this process of healing by water has evolved over the years and finds new expression through the charisma of modern technology.

SPLASH OF WELLNESS WITH OYSTER

At Oyster, we magnify the positive effects of water through our extensively researched designs and elevate your experience to inspire total wellness. Our advanced and exquisite range of bath products uses water or hydrotherapy which is the combination of water, heat and air, to promote health and well being. Hot baths can help to dilate blood vessels, improving blood flow to sore or damaged tissues. Water is infused with all these amazing benefits and we recreate them to ensure that your experience with water is not only blissful, but also absolutely healthy.

PRO 4 HEALTH TECHNOLOGY

At Oyster, we believe in creating experiences that are tailor-made to suit your health needs and preferences. And that is what inspires us to care for your wellness using hydrotherapy, chromotherapy and air massage. These advanced technology features offer both comfort and convenience through our varied products, thereby ensuring rejuvenation with each and every shower.

CHROMOTHERAPY BENEFITS

- It aims to target the core of every illness by restoring the balance between the body's electrical and magnetic field
- Revitalizes the psychological and hormonal system
- Be it the body's cells or organs, it re-energizes every atom of the body
- Reduces blood pressure and calms both breathing & heart-rate
- Fights depression, bulimia & other psychosomatic conditions

HYDROTHERAPY BENEFITS

- Boosts immune system.
- Increases metabolic rate and digestion.
- Increases waste elimination, therefore assists in detoxification
- Eases tight muscles and encourages relaxation
- Stimulates blood circulation and supply and improves organ functioning
- Hydrates cell, improves skin and muscle tone
- Eliminates long term respiratory difficulties such as asthma & bronchitis
- Relieves tension, headache and eye strain

WHIRLPOOL BENEFITS

- Eases muscle pain
- Reduces stress
- Promotes glowing skin
- Improves blood circulation
- Slows down ageing process

AIR MASSAGE BENEFITS

- Promotes a sense of calmness and relaxation
- Enhances circulation
- Full body massage
- Soft bubbles from jets allows bathers to soak for long periods of time
- Intensity of bubbles can be controlled
- It is safe to use bath oils, sea salts & mud masks
- Air massage tubs do not require large floor space
- Air compressor can be placed anywhere

SERENE SPA

FOR A BLISSFUL EXPERIENCE

Our spa range offers dynamism to your everyday journey of freshness and well being. You can easily dive into the elaborate realm of the serene spa along with the benefits of cost efficiency and moderate energy consumption in its features.

Efficient Thermal Regulation

The control system of the spa performs better in terms of its thermal capacity and conserves energy. It adapts to the environment around. By reducing the required temperature before the switching on of the heater, one can get consistent temperature thereby reducing the costs related.

Superior Cabinet Insulation

Retains heat from the pumps and insulates it from losing heat due to the environment around it. This helps in decreasing loss of heat and running costs. You can have a tranquil spa experience without any worry related to costs and energy.

Power Saving Smart Meter

The power saving option in our smart meter allows the user to regulate the energy consumption and usage to a large extent. The software enabled to maintain the consumption allows filtering and heating also. You can effectively control the meter and the system according to your preference.

Paper Filtration System

Paper filtration system consists of a pleated paper or polyester element that fits inside a cylindrical space formed into the side of a fiberglass spa shell, or the cartridge fits inside a small round canister located near the pump. Dirty water from the spa is drawn in around the outside of this filter element and passes through the element. The dirt and debris is then filtered properly and circulated back to the spa as clean and safe bathing water.

Ozonizer

Elevate your spa experience by ozone generation into your spa. The oxidizing property removes the bacteria from the water, leaves no residue and helps you to have an enriched spa journey.
